

Exploded View of X0101 Faucet

The X0101 Black faucet was used on the CBR Towers from 2009-2013.

This faucet is still currently on all Countertop models.

CR-1, CR-1SW

CR-2, CR-2SW

CP2000-CT2

CP-JR-CT2

The Faucet handle is Self closing when released. The internal spring creates this tension to close the valve and shut off flow. The Spring can be removed if self closing is not desired.

Speedy Faucets Change, Q4 2016.

Now standard on all CR-1 & CR-2 countertop model configurations.

Downward pointing bowed nozzle. Also raised position on panel of CT models for more clearance.
